NOTICE to the MEMBERS

MED EVALUATION UPDATE

Responding to feedback from the NCCP partnership, the Coaching Association of Canada has revised the MED evaluation to a 6-step process and has enhanced the e-learning landing page for coaches taking the MED online evaluation.

One, 6-Step Online MED Evaluation

As of May 1, 2017, coaches will only need to complete 1 MED evaluation for certification in order to complete all of their certification pathways.

The MED evaluation uses the same 6-step process taught in the MED module.

Please note that the 5-step process for community coaches has been removed from the MED online evaluation.

What does this mean?

For Ringette Coaches with CSI MED training and evaluation who require the CI MED; they will be able to complete a 6-step MED evaluation currently available (previously CI MED) at no charge, until **December 31, 2017**. No re-training is required either.

Although we have been giving credit as a temporary solution (see memo dated November 10, 2015) coaches in that situation will now be able and required to complete the 6-step MED evaluation, replacing the 5-step evaluation (CSI) which no longer meets standard to reach TRAINED status in the CSI context.
